

UroVysion Proficiency Panel

Enhance your lab's ability to produce consistent, quality results with UroVysion

Normal UroVysion Results

Reassure your staff, administrators and referring clinicians that UroVysion is being optimally performed and interpreted. It is convenient and efficient with the new UroVysion Proficiency Panel. The kit has five specimen slides with a mixture of cultured cell lines and cells obtained from urine samples. The slides mimic the finite set of possible results your lab may observe when performing the UroVysion assay on patient specimens.

- Excellent for training new staff members
- Helpful as a refresher for existing staff
- Insightful when confirming that UroVysion assays are being performed correctly

Submit your results for a complete analysis and recommendations

Once your lab processes the UroVysion Proficiency Panel, complete and forward the Enumeration Report Forms to the Abbott Molecular Technical Services Team for a comprehensive analysis and confirmation of proficiency status. Technical Services will then provide results to you.

- A Certification of Completion will be issued to your lab if the panel was performed successfully
- If an opportunity to enhance performance is identified, the following services are made available:
 - On-site visit by our Technical Services Team
 - Telephone consultation for labs conducting independent training

UROVYSION

The UroVysion Proficiency Panel kit contains

- Five fixed, voided urine specimens applied to five microscope slides
- Six copies of the Enumeration Report Form for use in determining the results of the five specimens; one extra form is included for convenience

Abbott Molecular is committed to distinguished performance and exceptional customer support

From the assays we develop and manufacture, to the comprehensive technical support and training we provide laboratory professionals, Abbott Molecular is dedicated to exceeding your expectations. The UroVysion Proficiency Panel is just another example of our commitment to full-circle quality excellence.
